

Dark reddish brown hairy Sasquatch walks across road

Sighting Details:

Date: *2 yrs. ago no exact date*

Time of Day: *6:30 am*

Season: *Fall*

State: *Florida*

County: *Citrus*

Nearest town: *Homosassa*

Nearest road/Highway: *Old Mason Creek Road*

Weather Conditions: *Clear*

Terrain of Location: *Mixed mangrove and pine*

Anything else odd: *Only section of road with continuous wood line*

Other Witnesses: *Friend but did not see he was half asleep*

Local Stories: *Bait shop*

Submitted by witness on: *02/18/2021*

Original report:

I'm not sure on exact date but driving to a small boat ramp to go fishing with my friend at 6:30am off Old Mason Creek road there is a "S" curve in road and as I started into the curve 50 to 75 yards ahead of me was a very large dark reddish brown hairy animal or figure, or something walked across the road on 2 legs and looking at me. As I came around the curve it was gone. I stopped my truck in middle of road, my friend said "what's up?" I said, "did you see that tall reddish brown hairy thing crossing the road? He laughed thinking I was crazy.

I close my eyes and I see it like it was yesterday. It has changed all my beliefs. I don't know what I saw but it was there. It was huge and I'm a believer for life now after that day.

Follow up investigation by: David S

I spoke to the witness Mike A on 2/27/2021 3:00pm. His story stayed the same as we talked about his encounter. His enthusiasm of telling me his encounter was like most eyewitnesses' eager to get it off their chest to someone that believes their story. Mike also told me he and his friend that was with him in the truck during his encounter two years ago, were in another area close to Mike's house that is owned by Water Management. They went in at night and they were walking down the asphalt biking trail where people do biking and running on. He said they did this last weekend which would be 02/20/2021.

Mike said he wanted to see if they could find anything in the area, see or hear anything. Mike said it was a normal night with all the night sounds going on, so he decided to make yell like he saw on some of the Bigfoot shows, just to see what happens. Well, when Mike made the first yell, there was a coyote that sounded off, and just during or after the end of the coyote's sound, they both hear three fast knocks.

Being amazed at what they heard, Mike decided to do another yell, so he did and that is when things got real. Mike said after he did the last yell, there was no return knocks, but about 40 yards away they both heard, a stick break like something stepped on it. When that sound happened, all the night sounds just came to a complete dead stop! Nothing for a few minutes then they heard something break another stick and it was much closer, like it was advancing on them. Mike had a light with him so he shined it around but saw nothing. They both had the creepy feeling that something was watching them. They both left out of there because it was just too sinister for them.

Mike also told me today they plan on going back out there to see if they get another response or more. I suggest to him to either get a good audio recorder or use an app on his phone to record any audio they may incur tonight.

Mike said he would let me know if they get anything, and I told him to be safe out there. I also told Mike that we would be planning on checking that area out as well and for him to come along with us. So, we arranged that.

3/17/2021 Update: This area that Mike has been going in that is close to his home, has turned out to be a very interesting area. I will post our findings on our Field Evidence & Investigation's page with that information.
